

## TOP LAMBS AT KANSAS CITY SELLING FOR \$19.10

MARKET SOME HIGHER FIRST OF PRESENT WEEK.

**Strong Demand For Good Kind of Cattle, But All Others Are Slow to Get Rid of Late—Top On Hogs Reaches Eighteen-Fifty—Quotations Locally and Elsewhere.**

The Sun Special Service

KANSAS CITY, Mo., March 10.—Cattle receipts today seventeen thousand head and the market steady on native steers. Others slow at ten to fifteen cents lower. Top \$16.50. Hog supply thirteen thousand head. Market fifteen to twenty-five cents higher. Top \$18.50 and bulk \$17.00 to \$18.15. Sheep receipts ten thousand head. Market fifteen to twenty-five cents lower. Top on lambs \$19.10. Ewes \$12.50. Choice in prime steers continue very scarce regardless of the fact that receipts were seventeen thousand head. With this number of cattle on the market one would expect a few heads of choice steers. However, the bulk runs to the plain mediumweight kind. Colorado pulpers topped the market today, forty-four head from Fort Collins averaging twelve hundred and thirty-five pounds sold for \$16.50, the top. Good choice steers are in demand, while others are closing ten to fifteen cents lower. Butcher grades about steady, good cows selling from \$12.00 to \$15.00 and ewes from \$5.50 to \$6.50, bulls steady at \$9.50 to \$12.50 and veal calves steady, selling from \$11.50 to \$14.00. Others dull. Stockers and feeders slow and irregular. There is a good demand for the good kind. Others are slow to move, feeders selling from \$11.50 to \$15.00, shearer steers from \$10.50 to \$14.50 and stock cows and heifers selling from \$8.00 to \$10.00.

Hog supply today thirteen thousand head. The market opened ten to twenty cents higher over Friday, slow and closed fifteen to twenty-five cents higher with a good clearance. Top today \$18.50, medium and butchers selling from \$17.75 to \$18.35, hams from \$17.50 to \$18.00 and bulk selling from \$17.00 to \$18.15. Pigs \$13.00 to \$17.00.

With ten thousand here today, the bulk being Californians of the feeder kind, the market closed fifteen to twenty-five cents lower. Top lambs today are \$19.10 and ewes \$12.50. No yearlings or wethers on the market.

### WAGES FOR SHEEPSHEARERS MUST COME DOWN, SAYS HE

Recommendation that Utah sheepmen fix a standard wage for shearers and camp tenders and a definite rate for shearing is contained in five thousand circular letters mailed throughout the state by C. H. Stewart, secretary of the Utah Woolgrowers' association. The wage suggested for shearers is seventy-five dollars and sixty dollars is proposed for camp tenders. This includes board in each case. According to Stewart within the last three years the pay of this class of help has advanced from fifty dollars and forty dollars a month, respectively, to an uncertain figure at present. Some shearers have received as high as ninety dollars and a hundred dollars a month and board during the past season.

This figure is exorbitant, thinks Stewart, in view of the fact that board for the shearers and camp tenders has trebled in the last three years. "Now soots," says Stewart, "a dollar and a half's day to feed a man on the range, whereas three years ago fifty cents was the board limit." The shearing figure which the woolgrowers will try to make standard is twelve cents a head when board is furnished and fourteen cents when the shearers board himself.

Ratification of the recommendations is looked for at the annual woolgrowers' convention to be held at Salt Lake City April 1st, next.

### STABILIZING OF PORK PRICES IS TERMINATED

Removal of pork and pork products from the export conservation list is accomplished by the war trade board, effective last Friday. At the same time the board rescinded the regulations by which all applications for licenses to export those commodities

to European destinations were required to bear a certificate from the government at auction that the food administration showing that the administration had approved the sale price. The statement regarding the board's action said in part: "The specific effect of this action of the war trade board is to destroy the ability of the United States food administration to further stabilize the price of live hogs. It was the desire and has been the endeavor of the food administration to continue this stabilization as heretofore and until March 1st, when the normal marketing period of hogs farrowed in the spring of 1913 would have terminated."

#### Lower Rates Are Made.

WASHINGTON, D. C., March 8.—Lower freight rates in many cases on shipments of live stock in southwestern territory were, in effect, provided today by an order of the interstate commerce commission suspending op-

### SOME ESSENTIALS IN SHEEP RAISING.

Sheepraising does not require expensive equipment or heavy labor, but does require study and continuous attention. The beginner may acquire experience with less than twenty acres, but for economy of time and tending, and to assure proper care, flocks of sixty or more ewes are better. In most cases lambs are most profitable if made ready for market about four months, weighing sixty-five to seventy-five pounds. Unless the flock has a very large territory to range over it is necessary to make division of the pasture or to use seed-crop crops. This permits the change of grazing ground necessary to insure the health and thrift of the lambs.

erations of long and short haul regulations affecting this class of traffic. The rule, which affects both federal controlled and non-controlled lines, reads: "When two or more routes or railroads composed of lines parties to this tariff shall be in operation between shipping point and point of destination, the lowest rate applicable via any of such routes shall be applied via the other routes excepting the freight for transportation between such points. The rates from or to intermediate points shall not be affected except that the rates from or to the intermediate points shall not exceed the distance scale of rates prescribed herein for like distances, and provided further that the rate to the intermediate point shall not exceed the lowest combination of rates."

#### Government Wool Sold.

PORTLAND, Ore., March 8.—The government today took the first steps toward disposing of the immense stock of wool it is holding in Portland by conducting an auction sale at which 1,150,000 pounds were offered by Charles H. Green, United States wool administrator and distributor. The amount sold was more than 700,000 pounds, the remainder not being the minimum price. The total proceeds were about \$300,000. The sale included all varieties of wools from the Pacific Northwest, together with a number of lots of California-sourced wools. The demand was heaviest for the lower grades. Prices ranged from twenty-six to forty-nine cents for fine and fine medium-thirty-three to fifty-two cents for three-eighths clothing; twenty-six to forty-one cents for the half-blood clothing; thirty-nine to forty-two cents for common and braid, and seventeen to twenty-eight cents for inferior wools.

#### Red Cross Calf Call.

County chairman of the various Red Cross helper committees in the several counties throughout the state are sending out a call for helper sales. These calves are to be sold at the fall stock show which is to be held in Salt Lake City the first week in April.

The money derived from the sale of calves donated will not go into the general Red Cross fund.

Each chapter will receive the exact net amount of money derived from the sale of calves contributed by them. R. J. Shields, manager of the Salt Lake county chapter of the Red Cross, requests that all helper self committees send in a report as to how many calves will be sold so that adequate accommodations may be arranged for the same. All cattle must be shipped as to reach Salt Lake City by April 3d, as judging and the award of prizes begin on that date.

#### Cold Storage Meat.

Meats held in cold storage in the United States at the end of February, 1913, greatly exceed in quantity the amount held at the same time in 1912, according to a report just received by Commissioner Walter M. Boyden of the state dairy and food department from the bureau of markets associated with the federal department of agriculture. Increases in the different meats, including salt pork, run all the way from 21 per cent to 886 per cent.

There is also a substantial increase in creamery butter held in cold storage.

#### WITH THE LIVE STOCKMEN OF THIS SECTION OF UTAH

Owing to the great shortage of horses in Europe and the demand for horses to this country it is probable that the United States will sell or finance all its war horses now overseas.

An effort will be made at the next annual meeting of the Utah Woolgrowers' convention to have the state live stock board issue a general order for all sheepmen in Utah to deposit their hounds.

The horses recently sold by the government at auction at the camp and regimental stations brought an average of seventy-five dollars. They cost an average of a hundred and seventy-seven dollars.

Coke Roberts, a steer buyer from Hayden, Colo., was in Mays a few days ago meeting with local cattlemen and negotiating for their steers. Roberts made an offer of forty-five dollars for yearlings and sixty dollars for two-year-olds. While most of the cattlemen have as yet contracted to him, it is understood that some of them will at the prices offered.

Shearing will begin at Mays and at the Jensen caravans, the latter over south of Price, about the 10th of April. Some sixty thousand are expected to be put through at the former place and some fifty thousand at the latter. Owners are talking twelve

## MANY NEW FLOCKS OF SHEEP SINCE LAST SEASON

### SIZE AND QUALITY OF LAMBS DETERMINE PROFITS.

Specialists of the Department of Agriculture At the National Capital Point Out Things That Should Be Known By Amateurs Engaging In Stockraising Everywhere.

Correspondence The Sun.

WASHINGTON, D. C., March 10.—Many new flocks of sheep were established in the farming states last year and this spring their owners will for the first time experience the lambing and shearing seasons. Spring which is the lambing and shearing season, is the harvest period of the sheepman, say specialists of the United States department of agriculture, and the size and quality of these crops determine the profits. At this time extra attention should be given to the ewes and lambs. In no other way can time be used to better advantage on the farm. If the ewes have not been properly fed and cared for during the fall and winter the crops of lambs and wool can be neither large nor of high quality. It is the weak, thin ewes that require most attention in the lambing season, though previous mistakes cannot be remedied at that time. On the other hand, failure to be constantly near by while the lambs are arriving may mean the raising of only an 80 or 90 per cent crop of lambs where a 125 per cent increase—considering that many ewes will have twins—can readily be realized from good shepherding of the flocks of nation quality.

In many sections it is most preferable to have lambs arrive in March or even earlier. One important advantage of this plan is that other work is then less urgent and full attention can be given to the ewes and the new arrivals. Another advantage gained by early lambing is that the lambs can be made sufficiently heavy and fat to market in June or July. Early marketing usually means higher prices, and it is especially desirable because the lambs are disposed of before the time of greatest danger of injury by internal parasites. The ewe lambs are stronger than those which arrive later in the season and are therefore kept for the breeding flock. They are less susceptible to injury caused by parasites, which is most serious in warm, damp periods of July or August.

The lamb that is born strong and vigorous, with a good dam, will need little care. Prompt attention given to the weak lamb immediately upon its arrival will frequently result in saving its life. In cold weather lambs should be wrapped in hot flannel cloths to prevent chilling, which may result in their death, and the cloths should be renewed as often as is necessary to keep the young animals warm. Milk should be given freely and the lamb returned to the ewe as soon as it is strong enough. Sometimes it may be necessary to feed the lamb with an infant's nursing bottle, giving a few teaspooons of milk every hour for a few hours until it is strong enough to nurse without assistance.

If lambs are to be sold at three to five months of age they may run with their dams until that time. The lambs kept for breeding purposes should be weaned at the same time and put on fresh pastures where there is no danger of stomach worms. Where the weaning is done at this time the ewes can be put in better condition for the fall breeding. When lambs are to be kept on the farm the best method of weaning is to leave them on the old pasture for three or four days, removing the ewes to a scanty pasture to check their milk flow. As soon as the lambs cease nursing for their dams they may be removed to fresh pastures. Ewes with lambs should be partially milked out every three days until they dry.

Details on the care of the flock during the lambing season are given in Farmers' Bulletin No. 840, "Farm Sheep Raising for Beginners," copies of which can be had, so long as the supply lasts, by applying to the United States Department of Agriculture, Washington, D. C.

#### BABY CHICKS ARE TO BE SOLD BY THE STATE

The poultry department of the Utah experiment station has just installed a steam incubator with a capacity of eighteen hundred eggs. It will be used in connection with the biological investigations which are being conducted at the station. The chicks hatched will be from the white leghorns which the station has been breeding for egg production and will be sold throughout the state to various parties in lots of not more than a hundred. Professor Alder, the station poultyman, now estimates that orders have been received within the last few months for at least thirty thousand baby chicks for spring delivery, of which not more than three thousand can be supplied.

An old saying was "the larger the hives the better the bread," but the modern breadmaker changes it to "the smaller the loaves," etc.

#### FORGET WHAT HE NEEDED.

From the Republican, Mt. Gillett, Colo.—"The editor had an interesting experience some time ago when a young gentleman came to this office and asked for a copy of the Morris County Republican. He scrutinized it carefully when a copy was handed him, and then said: 'Now I know.' What is it you are looking for?" We inquired. "My wife sent me after a bottle of Chamberlain's Ointment. Henkley, and I bought this name. I went to several stores and the clerks warned over constantly in the line on the shelf except Chamberlain's. I'll try again, and I'll never go home without Chamberlain's Ointment." —Adv.

Details on the care of the flock during the lambing season are given in Farmers' Bulletin No. 840, "Farm Sheep Raising for Beginners," copies of which can be had, so long as the supply lasts, by applying to the United States Department of Agriculture, Washington, D. C.

Total imports of tungsten bearing ore in December, 1912, were 1663 tons, valued at \$1,184,500, the department of commerce now reports. Hongkong, China, and Chile were the chief sources. United States exports of tungsten and ferro tungsten metal in that month totaled 2225 pounds, worth \$5170, and were practically all to Canada.

The continued slim silhouette means that collars will be small but exquisite.

Black, brown and silver embroidery are charmingly used on black satin coats.

Cream color and black is a first choice in color combinations.

#### WARN AGAINST TRAFFIC IN WAR SAVING STAMPS

Word has been received by George L. Odell, state director of war savings, from Carter Glass, secretary of the treasury, and A. S. Burleson, postmaster general, warning that traffic in war saving stamps is illegal because stamps are not negotiable. Reports have been received that many stamps were being secured from the original purchasers by dealers. A. M. Forey, third assistant postmaster, who wrote for Burleson, says postmasters should not redeem stamps which do not have the names of the purchaser on the certificate as stamps are not collectible except by the original holders, except in cases of death or disability of the original holder, when the estate may redeem them. Holders of stamps are urged to keep them, as this forms a habit of Hertel. If it is found necessary to let them go, such may be obtained for them at any postoffice where money orders are sold, after ten days written notice has been given.

There are nearly five hundred miles of single track electric railroad being operated in Utah, according to a report given out by Director Sam L. Rogers of the census bureau, United States department of commerce. Salaries and wages paid approximate \$1,500,000 each year. In 1907, when electric railways were young in Utah, there were but about a hundred and twenty-five miles of single track in operation in the state.

For effectiveness is a drying of graduated pearls worn with a simple brooch.

Raglan and kimono sleeves appear on coats as often as the satin variety.
